### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Aaron Waxler (Reg. No. 48,027) on 03/25/09.

The application has been amended as follows:

**Claim 16, line 9**, "decoding the encoded data signal" has been changed to --the decoder decoding the encoded data signal--

**Claims 17-25** have been cancelled.

2. The following is an examiner's statement of reasons for allowance:

Applicant have cancelled claims 1, 5, 7-10, 13, 14, 17-25, 27-33 and amended claims 4, 16, 26 in accordance with the office action dated 09/10/08. The present invention relates to apparatus and method for decoding received signal using plural decoding stages and method. Such technique is not unknown in the art. Prior art of record (closest references, Koo et al. - US 5,345,231), however, taking individually or collectively, fails to fairly teach such particular apparatus and method, as claimed as a whole, including claimed subject matter "the decoding means including at least a first physical decoding stage and a second physical decoding stage, the first decoding stage being arranged to decode said data signal encoded in conformity with a first decoding method whereas the second decoding stage is arranged to decode said data signal

encoded in conformity with a second decoding method, and wherein said first decoding method is Manchester (MA) and the second decoding method is Miller; and wherein said decoding means further includes a decision stage capable of determining based on said decoding instruction information which of the first and second decoding stages is suitable to decode decodes the encoded data signal, and wherein the decoding stage information includes redundancy data" in independent claim 4; "wherein the decoding step includes a first physical decoding stage which decodes the encoded data signal in conformity with a first decoding method and a second physical decoding stage which decodes the encoded data signal in conformity with a second decoding method, wherein the first decoding method is Manchester (MA) and the second decoding method is Miller; and wherein the decoding step further includes a decision stage which determines which of the first and second decoding stages decodes the encoded data signal, and, wherein the data is output by the first decoding stage to the data processor before the decision stage decides which of the first and second decoding stages is suitable for the decoding of the encoded data signal" in independent claim 16 and claimed subject matter "wherein the decoder includes a first decoding stage and a second decoding stage, the first decoding stage designed to decode the encoded data signal which is encoded in conformity with a first encoding method and the second decoding stage designed to decode the encoded data signal encoded in conformity with a second encoding method, wherein said first encoding method is No-Return-To-Zero (NRZ) and second encoding method is Miller, and, wherein said encoded data signal has a structure that ensures that time intervals with high amplitude value of the

modulated carrier signal are substantially at least as long as time intervals with low amplitude value of the modulated carrier signal" in independent claim 26. Thus, claims 4, 16, 26 are found to be novel and unobvious over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dac V. Ha whose telephone number is 571-272-3040. The examiner can normally be reached on 4/4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Payne can be reached on 571-272-3024. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
